

Pharmacy Benefit Management Can Save Utah an Additional \$85 Million in State Medicaid Spending

- ▶ Pharmacy Benefit Managers (PBMs) saved Utah \$6 million in state Medicaid spending in 2016.
- ▶ These savings represent only a portion of the potential savings achievable if Utah were to fully utilize PBM tools and capabilities.
- ▶ The optimal use of PBM tools and capabilities for all of Utah’s Medicaid prescriptions would reduce drug spending 24% per beneficiary.
- ▶ As a result, Utah would save \$8 million in state Medicaid spending in 2019 and \$85 million over 10 years (2019-2028).

Utah’s Medicaid Savings through Pharmacy Benefit Management

Savings Already Realized	\$6 Million 2016	\$19 Million 2011-2016
Savings Opportunity	\$8 Million 2019	\$85 Million 2019-2028

With Medicaid prescription drug spending increasing in recent years – driven both by higher prices and increased volume – states are increasingly turning to PBMs to manage drug benefits for Medicaid populations, including beneficiaries with health plan coverage and those in fee-for-service. Through their expertise, data analytics capabilities, and negotiating capacities, PBMs improve quality, safety, and appropriate drug use, achieving the highest value for states and the consumers they cover. Specific PBM tools and capabilities include:

- ▶ Driving use of the highest therapeutic quality, lowest-cost drugs and shifting utilization from brands to generics as clinically appropriate;
- ▶ Developing preferred pharmacy networks;
- ▶ Advancing evidence-based, clinically effective utilization; and
- ▶ Leveraging data analytics to detect and prevent fraud, waste, and abuse.
