

# Optum Rx pharmacy services support consumers

Optum Rx is helping people access the medications they need at prices they can afford.

## Consumer cost solutions available now

- ✓ **PreCheck MyScript** delivers consumers real-time medication costs at the point of prescribing, saving an average of \$225 per prescription.
- ✓ **Point of Sale Program** lowers costs for consumers who are taking a rebate-eligible medication, saving consumers nearly \$100 million in 2022.
- ✓ **Proactive Savings Alerts** notifies consumers of savings opportunities averaging \$58 per prescription.
- ✓ **Price Edge** automatically provides members with lowest available drug price counting toward their deductible and out-of-pocket maximum, saving members on average \$7.98 per script for covered drugs and \$49.20 per script for non-covered drugs.
- ✓ **Best Price Engine** combines benefits, formulary, drug alternatives, location and other available information to provide consumers additional medication options and optimal price.
- ✓ **Optum Savings IQ** matches patients taking specialty drugs with available financial assistance, saving patients \$1.5 billion since 2022.
- ✓ **Easy Payment Plan** allows Home Delivery costs to be spread over three smaller monthly installments, meeting consumer affordability needs and ensuring easy access to medications.
- ✓ **Preventive Drug List Program** ensures access to preventive drugs for at-risk members, driving more than \$21 million in consumer out-of-pocket savings already in 2023.

## Solutions coming soon

-  **Making critical drugs more affordable.** We have more than 170 unique medications under \$35, including insulin for diabetes, Epinephrine for allergic reactions, Glucagon for hypoglycemia, Naloxone for opioid overdoses, and Albuterol for acute asthma attacks, with plans to provide broader formulary access for the same medications at a lower cost to consumers.
-  **Addressing out-of-pocket costs for high deductible plans.** For individuals in high deductible health plans, typically with greater out-of-pocket costs, we are implementing additional preventive drug options to support those at risk for developing certain conditions.
-  **Expanding choice and improving affordability.** Optum Rx will now include a fourth biosimilar to Humira, with the addition of the first option priced less than \$1,000 per treatment.
