

Sustainability 60 Newsletter

July 2025

Your monthly supplier update in just 60 seconds

Welcome to the first issue of Sustainability 60—our new monthly newsletter designed to keep you informed and inspired in just 60 seconds. Each edition delivers quick, impactful updates on our shared sustainability journey, including program news, upcoming events, and supplier success stories.

New This Year: Energize Renewable Energy Initiative

We're sponsoring the Energize program this year to help you explore clean energy solutions and accelerate your sustainability goals, all at no cost to you. [Sign up now!](#)

More tools, resources, and opportunities to get involved will be provided in the [information session](#) hosted by Schneider Electric on July 16th.

Carbon Disclosure Project (CDP) Supply Chain Program Relaunch

We're once again partnering with CDP—the global leader in environmental disclosure. This program invites suppliers to share climate-related data, helping us build a more transparent, resilient, and low-carbon supply chain. You should have already received an invitation to complete the survey. Please let us know if that is not the case.

Why it matters: Participation supports your own sustainability goals and aligns with global best practices.

Spotlight on Innovation: Reducing Waste at Scale

Each year, more than **23 million pill bottles** are discarded in our pharmacies—a staggering number with significant environmental impact. That's why we're partnering closely with our suppliers to rethink and redesign how medications are packaged.

We're excited to share that our supplier collaboration is already showing promise. We're currently tallying the results and can't wait to reveal the impact at our supplier summit in August. Stay tuned!

Thanks for reading Sustainability 60—your sustainability snapshot in 60 seconds.

Upcoming Dates

August 6, 2025: Virtual Supplier Sustainability Summit at 9:30 am CST

Back by demand! Our first summit since 2023 builds on big progress and bold goals. [Click here to register](#) to join us to hear what's new, what's next, and how we'll drive impact—together.

Sustainability Tip

Reducing and optimizing packaging not only helps the environment, but it also reduces your costs.
